

Amyloid fibrillation

Protein

Membrane

April 17 (Fri.) Seminar  
from 15:00

## "Membranes in amyloid diseases – not an innocent bystander?"

Invited Speaker: Prof. Raz Jelinek

(Ben-Gurion University of the Negev, Israel)

Place: Institute for Protein Research (4F Seminar Room)

### *Biography*

--Raz was born in 1964 and grew up in Beer Sheva. He studied Chemistry at the Hebrew University in Jerusalem and received his B.Sc. in 1988. Raz moved to California and completed his PhD in 1993 at the University of California, Berkeley with Professor Alexander Pines in the field of solid state Nuclear Magnetic Resonance. From 1993 until 1996 he worked as a Cancer Research Institute Post-doctoral Fellow at the University of Pennsylvania on structural biology of short antimicrobial peptides. He joined the Chemistry Department of Ben-Gurion University in 1996, where he is currently an Associate professor and Chairman.-
